Riverwood Solutions Announces Expansion Plans on the Back of Record Q4 Results

Company Hiring Globally to Support Explosive Growth

MENLO PARK, CA--(Marketwire) – February 21, 2012 - [Riverwood Solutions](#), the innovator in [managed supply chain services](#) and operations consulting, today announced that it plans to hire new staff in the US, China, and Malaysia to support its rapidly expanding business.

Riverwood is looking for the world's best supply chain management, outsourced manufacturing management, and operations talent to fill a number of positions in California, Texas, Shenzhen, and Penang. Positions are available at several different levels of the organization with minimum experience requirements ranging from five years to 20 years.

"Over the last few quarters Riverwood Solutions has seen a dramatic increase in both new business and organic growth from our existing customer base. Quarter over quarter revenue growth has accelerated in the last two quarters from 37% to over 68%, creating a need to expand staffing levels in both the US and Asia," said Ron Keith, Chief Executive Officer of Riverwood Solutions. "As manufacturing and upstream supply chain management has become increasingly decoupled from the core of most product companies, the need for access to independent domain expertise in manufacturing, outsourcing, and supply chain has just exploded."

The search is on for dedicated professionals with extensive experience in sourcing, procurement, materials planning, logistics, and outsourced manufacturing management to support rapid growth in both the company's consulting business as well as its managed services business. Riverwood Solutions has numerous positions to fill at our offices in Silicon Valley (Menlo Park), Dallas, Austin and Shenzhen; with a more limited set of positions available in both Zurich and Penang. Interested parties should contact the company at jobs@rwsops.com.

About Riverwood Solutions

Riverwood Solutions helps OEMs and Brand Owing Enterprise of all sizes with manufacturing strategy, supply chain performance, operations optimization, and supply relationships. The company provides consulting and managed services to technology product companies on a local and global basis.

Riverwood's team of electronics industry executives and professionals has decades of international experience in negotiating contracts and pricing, launching products, running operations, and managing outsourced supply chains. The company's proprietary and award winning HOSTSM (Hybrid Outsourced Services Team) Model uses local resources near the supply base to improve supply chain performance without adding fixed costs or internal infrastructure. Headquartered in Menlo Park, CA, Riverwood Solutions designs, implements and manages global supply chains from offices in the USA, Mexico, Switzerland, and China.
