RIVERWOOD SOLUTIONS LAUNCHES REVOLUTIONARY SERVICES COMPANY FOR SMALL TO MID-SIZED OEMS AND BRAND OWNING ENTERPRISES

Company Founders Include Well-Known EMS Industry Executives

MENLO PARK, CA, September 25, 2008--Riverwood Solutions LLC, today announced the launch of the first ever comprehensive professional services company dedicated to meeting the operational, supply chain, and logistical needs of small to medium businesses (SMB). Providing a broad range of services, Riverwood Solutions helps OEMs and Brand Owning Enterprises design, implement, and manage their supply chain to achieve the lowest Total Supply Chain Cost (TSCC).

Founded by a group of former EMS industry executives that includes Matthew Ryan, most recently EVP of World Wide Operations and Logistics at Flextronics, Riverwood Solutions provides OEMs a revolutionary approach to addressing the need for skilled operations talent in low cost manufacturing centers around the world.

"Having traveled to various low cost regions on a regular basis, it became very clear to me that there was a real need for servicing the operational requirements of OEMs with experienced, independent, in-country supply chain support in the world's manufacturing centers," stated Matt Ryan, Chief Executive Officer and co-founder of Riverwood Solutions. "Globalization and the exponential growth of outsourced manufacturing have clearly created some waste and inefficiencies in supply chain management, and smaller companies disproportionately bear the costs of these inefficiencies. Riverwood Solutions' HOSTSM model helps level the playing field and allows smaller companies access to talent, tools, know-how, and processes that until now have largely been the exclusive domain of the world's leading OEMs."

Riverwood Solutions provides a full range of supply chain and operations management services. The process starts with a detailed assessment of its client's unique supply chain needs. The company then develops a detailed implementation plan and customized implementation team. After implementing the supply chain and operations solutions on behalf of the client, Riverwood Solutions provides the client ongoing support with local interfaces in innovation centers and a broad range of operations professionals on the ground in the manufacturing centers.

"Riverwood Solutions has assembled a remarkable team of operations professionals that most small companies would typically not have access to," said Michael Marks, Managing Partner of Riverwood Capital, former CEO of Flextronics, and an early investor in Riverwood Solutions. "In addition to the strong team, the Company's service-marked HOST model provides OEMs access to highly skilled operations professionals in

the world's innovation centers as well as access to a broad array of subject matter experts in the low cost regions that have become the world's factors.”

About Riverwood Solutions

Riverwood Solutions is a professional services company that provides a broad range of operations, sourcing, supply chain management, and logistics services to OEMs and Brand Owning Enterprises. Riverwood’s teams of highly skilled operations professionals design, develop, and manage supply chains for Riverwood’s clients using highly refined processes. Riverwood Solutions has operations professionals in low cost manufacturing centers to provide their clients with a broad array of in-country support services such as supplier management, program management, NPI support, and logistics.

Riverwood Solutions was founded to serve the supply chain needs of small to mid-sized business that lack the scale and capabilities of larger outsourced OEMs. The company is headquartered in Menlo Park, California and has offices in Dallas, Texas, Guadalajara Mexico, and Shenzhen, China.
