

Riverwood Solutions Announces Key Milestones in Helping Innovative Start-ups Get Cool Products to Market

Company celebrates major milestones in its growing role as an innovation to market enabler

Las Vegas, NV--(Marketwired – January 8, 2016 - [Riverwood Solutions](#), the leader in managed supply chain services, and manufacturing, design, and operations consulting, today announces the achievement of several key milestones as an innovation enabler:

- Fiscal year 2015 revenue reached another record, up more than 90% year over year.
- Recently signed its 150th OEM customer services agreement.
- Just completed its 500th OEM project in manufacturing and supply chain design, optimization and implementation.

"It's been quite a journey for all of us at Riverwood Solutions and we are excited and humbled by the accomplishments that we announce here today," said Mark Medlen Co-founder and COO of Riverwood Solutions. "In 7 years we have grown from a concept and a business plan in the depths of the great recession to a significant player in enabling the kind of innovative products on display here at CES 2016. Today I can count no less than 30 companies at CES where Riverwood Solutions has played a meaningful role in their success."

About Riverwood Solutions

Riverwood Solutions (www.rwsops.com) helps OEMs improve supply chain performance, optimize their operations, and maximize the value of their outsourced relationships. The company provides operations consulting, product development, and managed operations services to technology product companies globally. The company's proprietary and award winning HOST(SM) (Hybrid Outsourced Services Team) Model provides highly skilled local resources to help OEMs manage their supply base and improve supply chain performance without adding fixed internal infrastructure. Headquartered in Dallas, TX, Riverwood Solutions designs, optimizes, implements, and manages global supply chains from operations in Silicon Valley, Dallas, Austin, Shenzhen, Suzhou, Mexico, Taiwan, Thailand, and Vietnam for some of the world's leading OEMs and most promising start-ups.
